**\*\*\*PLEASE NOTE and ACKNOWLEDGE ADDENDUM NO. 2\*\*\***

**The following forms part of the tender Request**

---

In response to questions received by Department of Communities in relation to the Housing Authority-owned multiple dwelling sites available for development under Category B, the following advice is provided:

1. Respondents should seek to deliver a minimum 20% of all dwellings to be in accordance with Livable Housing Australia Silver level. Where this is not possible (e.g. upstairs dwellings in walk-up developments), these departures from the standard should be noted.
  2. At this stage, Respondents are not required to engage with the local government authority directly. The provision of a written report from a qualified town planner or design professional confirming that proposed dwellings are capable of obtaining a development approval with acceptable conditions will suffice.
  3. It is expected that proposed developments for the four listed Category B sites will be specifically designed with multiple dwellings in mind.
  4. Respondents are not required to lodge submissions for all four sites and may lodge submissions of any one or more sites.
  5. Each site listed under Category B opportunities represents an individual project. As such, they should be the subject of a separate submission.
